Summary: Test engineer having five years' experience working with IT Infrastructure products such as servers and systems management software. Recently upskilled on Python + Selenium from QSpiders Bengaluru. Seeking opportunities in Test Engineering, automation roles in either software or firmware related roles. Immediate joiner.

Education:

MBA (General)
University of South Wales, Pontypridd, Wales.
2022

BSc (Hons) Electrical and Electronics Engineering,
University of South Wales, Pontypridd, Wales.
2020

Diploma in Electronics,
NTTF Bengaluru, India.
2013

Work Experience (Full-time):

QA Engineer, Bengaluru, India
Intelliswift/Trellix May 2024 – July 2024

- Manual and automation testing of Trellix EDR products.

Firmware Test Engineer 2, Bengaluru, India
Dell Technologies May 2022 – April 2023

- Ownership of Driver pack feature which included, test estimation, test case identification, test environment setup (identification of servers and bringing them up), and execution of test cases (manual and automation using python).
- Optimizing the entire test process which led to early finding of defects, increase in number of defects by 35% and overall reduction in execution time by almost 20%.
- Identification of automatable areas and drive automation of key areas which helped in reduction of resources by 25% needed for test execution.

Test Engineer- 1, Bengaluru, India
Dell Technologies September 2015 – August 2019

Validation of Dell PowerEdge systems management Software: iDRAC and Lifecycle Controller.

- Execution of functional and Nonfunctional tests on Dell servers using various GUI and CLI

interfaces.
- Configure, provision, and maintain servers using VMware tools as part of test environment build.
- Ad-hoc troubleshooting and problem solving as required.
- Undertake Feature ownership and provide test case inputs for each software release.
- SMaC U (social media and Communities) certified to assist customers to resolve technical issues, create product video tutorials for customer trainings.
- Automation tool ownership and maintenance.

Test Engineer, Bengaluru, India
LG Soft India March 2014 – July 2015

RF performance testing for LG smartphones and feature phones, and other Non-functional test activities.

- In live network conditions, the RF module on the DUT is tested using various call scenarios to ensure all call operations are working as expected.
- Logs are captured using tools such as QXDM and MTK Catcher for radio related logs, Defects captured and driven to closure using HP Quality Centre.
- Audio quality, Bluetooth, Wi-Fi and GPS module tests were performed on DUT to ensure accuracy.
- Test Case writing, inventory management and audit.

Certifications:

- Python, Selenium (Training from Qspiders Bengaluru).
- Crash Course on Python: Certificate link
- Agile with Atlassian Jira: Certificate link

Recognition:

- On the Spot Award for SHA Certificate validation Effort and Automation tool Ownership (Dell).
- Appreciation for “Best Effort” for “User Pattern” activity for coming up with unique real-world customer usage scenarios leading to improved defect find rate and test coverage. (LG Soft India).
